Daily Softs Technical Charts

NY 2nd Month Sugar Futures

NY sugar futures gained ground yesterday as buying pressure triggered a close on the front foot at 14.00. The stochastics are rising with the %K/%D exiting the oversold area, as the MACD diff is negative and converging on the upside. This suggests we could see higher prices in the near term towards 14.17, but the market needs to take out immediate resistance of the 40 DMA at 13.96. On the downside, the candle found support at 76.4% fib level at 13.79, and if the prices break through this level, we could see prices retreat back through the 100 DMA at 13.57 before 13.35. The three white soldier formation is a bullish signal, but futures need to take out 13.97 in order to confirm the outlook on the upside.

10 Day % K Stochastic	44.15	Rising	
10 Day % D Stochastic	34.52	Rising	
14 Day RSI	51.72	Rising	
Support	13.79	13.57	13.35
Resistance	13.96	14.17	14.27
Moving Averages (10,40,100)	13.87	13.96	13.58
Open Interest	1,050,405	(-849)	

Ldn 2nd Month Sugar Futures

Ldn sugar futures edged higher yesterday and managed to close above previous resistance of the 10 DMA at 396.70. The indicators suggest we could see higher prices in the near term. The stochastics are rising out of the oversold, and the MACD diff is negative and converging on the upside. The RSI is rising, and we expect futures to edge higher in the near term towards 40 DMA 398 with the 76.4% fib level at 403.14 the robust level on the upside. On the downside, if futures fail into 393, then we could see futures break back below the 391.10 before the long term support of 385. We expect futures to firm in the near term; however, as DMAs converge to provide tighter support and resistance, we could see a strong signal, given one of the levels is broken.

10 Day % K Stochastic	47.45	Rising	
10 Day % D Stochastic	37.64	Rising	
14 Day RSI	51.20	Rising	
Support	393	391.10	385
Resistance	398	403.14	408
Moving Averages (10,40,100)	393.54	398.00	383.59
Open Interest	89,015	(+38)	

NY 2nd Month Coffee Futures

NY coffee futures edged lower yesterday as prices closed at 126.60. The indicators continue to favour the upside, however converging, with %K entering into the overbought area, suggesting waning buying pressures. A break below the 124.80 would bring into play the recent sessions' support level at 124.15. Prices have been relatively well supported below the trendline, and in order to indicate an improvement of market sentiment on the upside, futures need to gain a footing above 127.20 and then target the 23.6% fib level at 129.51 in the near term. The hanging man candle formation suggests that while there was a sell-off during the day, buyers had appetite for higher prices. The break above the resistance level, however, would confirm the ascending triangle formation.

10 Day % K Stochastic	78.92	Rising	
10 Day % D Stochastic	70.18	Rising	
14 Day RSI	64.34	Neutral	
Support	124.80	124.15	122.89
Resistance	127.20	129.51	132.05
Moving Averages (10,40,100)	122.88	116.11	117.26
Open Interest	256,183 (+939)	Volumes	20,234

Ldn 2nd Month Coffee Futures

Ldn coffee futures held their nerve yesterday as intraday trading saw futures test appetite at 1387. This level held firm, and the prices closed at 1387. The stochastics are rising, and the MACD diff converged into positive territory, signalling a change of momentum in the near term. To confirm the change of trend, the market needs to take out support 1378 and then 40 DMA at 1368. To reaffirm the trend on the downside, prices need to take out the recent low. On the upside, break above the resistance at 1387 could set the scene for futures to take out the 1407 level before targeting 1422. The convergence of DMAs provides strong support for prices, and if these levels remain firm, we could see prices edge higher.

10 Day % K Stochastic	82.04	Rising		
10 Day % D Stochastic	65.20	Rising		
14 Day RSI	55.84	Rising		
Support	1378		1368	1362
Resistance	1387		1407	1422
Moving Averages (10,40,100)	1364		1370	1362
Open Interest	106,583	(-4,194)	Volumes	20,593

NY 2nd Month Cocoa Futures

NY cocoa futures gained ground yesterday as buying pressure prompted a test of 40 DMA 2516. The market closed at 2496. The stochastics are decreasing, with %K/%D converging in the oversold territory, suggesting a change to bullish momentum in the near term. The MACD diff is negative and diverging. Wednesday's sharp break below the key DMA support points to a strong sell signal, however, we anticipate prices testing the moving averages once again today. A breach back above this level would bring into play the recent firm resistance of 10 DMA at 2569. Futures need to take out-trend resistance in order to confirm the trend. On the downside, the fall below previous day closing prices could trigger losses through the 38.2% fib level at 2414 and 200 DMA at 2409.

10 Day % K Stochastic	15.16	Falling		
10 Day % D Stochastic	19.48	Falling		
14 Day RSI	43.51	Rising		
Support	2434		2414	2409
Resistance	2516		2523	2569
Moving Averages (10,40,200)	2569		2516	2409
Open Interest	116,920	(+140)	Volumes	25,440

Ldn 2nd Month Cocoa Futures

Ldn cocoa futures took back some of the previous day's losses, as buying pressure prompted a close back above 2245 at 2254. The stochastics trended lower, with %K/%D in the oversold territory and the MACD diff is negative and converging, pointing to waning selling pressure. Yesterday's close above the previous day's open/close suggests appetite for higher prices. The prices need to break above the 100 DMA at 2257 and then the 40 DMA at 2270 to prompt futures to regain upside conviction. On the downside, a break below Wednesday's lows could pave the way for a test of support at 2186. The indicators point to diminishing *appetite for lower prices* in the near term.

10 Day % K Stochastic	16.08	Falling	
10 Day % D Stochastic	16.21	Falling	
14 Day RSI	50.27	Rising	
Support	2214	2186	2147
Resistance	2257	2270	2310
Moving Averages (10,40,100)	2422	2446	2237
Open Interest	208,433 (+324)	Volumes	20,813
